Professional Summary

Full Stack Developer with 1+ years of hands-on experience building scalable, high-performance web applications using **React**, **Node.js**, **MongoDB** and **Express.js**. Strong expertise in frontend performance optimization, RESTful APIs, and modern UI frameworks. Experienced in integrating **AI APIs (OpenAI, Claude)**, real-time systems, and database-driven applications. Passionate about writing clean, maintainable, production-ready code.

Technical Skills

Frontend: React.js, JavaScript (ES6+), Next.js, TypeScript, HTML5, CSS3, Tailwind CSS, Material UI, Redux Toolkit, React Hook Form

Backend: Node.js, Express.js, REST APIs, SQL, JWT Auth, Socket.IO, Database Integration, microservices

Databases: MongoDB, MySQL, Redis, Supabase, Mongoose, Pinecone (Vector DB)

Tools & Platform: Git, Github, Postman, Firebase, Puppeteer, Vercel, nodemailer, Railway

AI & Integrations: OpenAI API, Claude API, Third-party API Integration, Langchain

Experience

Falcrow Labs, Full Stack Developer

Feb 2025 - Jan 2026 | Mumbai

- Developed reusable, responsive UI components using **React & Tailwind CSS**, ensuring design consistency across application.
- Applied frontend performance techniques including **lazy loading**, **code-splitting**, **memoization**, and **useCallback**.
- Contributed to backend development by building RESTful APIs using **Node.js**, **MongoDB**, **Mongoose ODM**, and **Express.js**.
- Integrated third-party services and APIs to extend application functionality.
- Conducted code reviews to maintain clean architecture, readability, and best practices.

Codedaddy Web Solution, Frontend Developer Intern

Jan 2024 - May 2024 | Mumbai

- Developed a modern, responsive web application using **React**, **JavaScript**, and **CSS**.
- Implemented global state management using **Redux Toolkit** for predictable and scalable data flow.
- Created lightweight backend APIs using **Node.js**, **Express**, and **MongoDB (Mongoose)** to support frontend workflows.

Projects

DocuMind  | OpenAI, Langchain, Pinecone, Cloudinary

- Built an **AI-powered document Q&A platform** supporting **multi-document upload**, **semantic search**, and **context-grounded** answers using **gpt-4.1-mini**.
- Engineered a **RAG pipeline with OpenAI text embeddings** stored in **Pinecone vector DB** with per-user namespaced stores for isolated, accurate retrieval.
- Implemented conversation threading with per-chat history and automatic chat title generation.
- Designed end-to-end AI workflow including **data ingestion**, **embedding generation**, and **response synthesis**.
- Implemented **Zod schema validation** and centralized error handling middleware for consistent, production-ready API behaviour.
- Built a fully typed React frontend with TypeScript, Tailwind CSS, and Shadcn UI, using Zustand for global state and React Hook Form for form validation.

VideoTube  | React, MongoDB Aggregation, Tailwind CSS, Multer

- Developed a full-stack video sharing platform enabling users to upload videos, interact with content, and manage creator channels.
- Designed **MongoDB schemas** for videos, comments, users, and subscriptions to support **relational data** between creators and viewers.
- Built backend APIs supporting video uploads, comments, likes/dislikes, and channel subscriptions.
- Implemented watch history tracking and engagement features including likes, comments, and subscription relationships.
- Developed a **React interface with dynamic rendering and API-driven** state updates for seamless video browsing and interaction.

Education

M.H Saboo Siddik College of Engineering, University of Mumbai

May 2020 - May 2024 | Mumbai

Bachelor of Engineering in Computer Science (CGPA: 8.49/10)

Achievements & Certifications

- Qualified for the 1st Round in Institute level Hackathon - ERR404 
- Ranked 8th out of 512 participants on the GeeksforGeeks Coding Platform at the Institute level 
- Solved 250+ coding problems on the LeetCode, GeeksForGeeks and CodingNinja Platforms 
- Completed Full-Stack Development Bootcamp - Udemy
